More than half of the Ahlimbsmuehle (N 54/U 91) improvised airfield was plowed. The remainder was apparently used by Soviet troops since fire trenches and holes were observed. Civilian workers were fitting out the two-story building in the southwest corner of the field. The airfield was definitely not serviceable for aircraft.

[REDACTED] 25X1A

The status of the airfield has not changed compared with observations made by other sources in October 1949. No indications of intended reconditioning of the field were observed.
